DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-23, drawn to a fibrin-containing biological scaffold.

Group II, claim(s) 24-40, drawn to a method of culturing cells and a cell culture.

Group III, claim(s) 41-50 drawn to a concentration system.

Group IV, claim(s) 51-58, drawn to a method of operating a concentration system.

Group V, claim(s) 59-69, drawn to a system for producing a fibrin-containing scaffold.

Group VI, claim(s) 70-77, drawn to a method of producing a fibrin-containing scaffold.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: 2002/0094514 A1 teach a fibrin-containing biological scaffold comprising a mixture of fibrinogen concentrate and a fibrinogen activator. Casali et al disclose a fibrin-containing scaffold comprising fibrinogen concentrate from human plasma and a fibrinogen activator. Further, the concentrate is cooled, thawed and centrifuged. Meana (Burns, vol. 24, 1998) et al also disclose fibrin-containing scaffolds. EP 0877632 also disclose the process of obtaining a fibrin-containing scaffold. Thus, the invention lacks a special technical feature.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 1657

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tiffany M. Gough whose telephone number is 571-272-0697. The examiner can normally be reached on M-F 8-5 pm.
